### Torque Hydraulics

Torque Hydraulics a division of Torque Industries will design, build and install state of the art equipment to create fully integrated solutions. If it's a cylinder repair for your Header or a 1000Hp integrated power unit we have your every hydraulic need covered.

We know dependability and reliability are critical so we use nothing but the world's best. So if you need total project management or parts supply & repair, Torque Hydraulics can provide it all. Torque Hydraulics has South Australia's largest dedicated hydraulic service team available 24/7 for all your breakdown and maintenance requirements.

### The Torque Advantage

#### Torque Strength:

Torque's strength is its people. During the past 25 years the Torque team has grown to now include over thirty staff with countless years of experience and the right mix of skills. From our Sales Specialists, Mechanical and Electrical Engineers to our Service Technicians and Administration team we will help you to find the right solution and assist you every step of the way.

#### Torque Capability:

Torque Hydraulics can offer a Turn Key Solution taking care of every aspect of the project with full project management responsibilities, alternatively you may choose to have Torque Hydraulics assist your team to plan, design, build and install the tailor made solution you require.

Our repair and service facility is equipped with modern diagnostic equipment and the team will assist you to get up and running as fast as possible. Through our capabilities in design and fabrication we can select product that will require minimum maintenance and then install and commission, either at your site or ours.

#### Torque Safety:

At Torque Industries safety and sustainability are core values. We will assist you in the design and installation of safe, environmentally friendly systems and work practices that comply with your nominated standards. Our team is fully trained and all on site personnel are accredited engineering professionals to ensure both Torque's standards and your expectations are achieved.
