### HYDRAULIC CYLINDERS

#### PARKER SEIRES 2H

Series 2H cylinders set the standard for performance, durability, and trouble free operation. Parker superior design, the use of high quality materials and stringent manufacturing practices provide all customers with long cylinder service life and reduced operating costs.

#### PARKER SEIRES 3H

Series 3H Cylinders provide unmatched reliability, performance, and innovative design features that aid in increasing productivity while reducing operating costs. Parker's externally removable bolt-on gland assembly makes preventive and routine maintenance quick and easy!

**Align-A-Groove** - A  $\frac{3}{16}$ " wide surface machined at each end of the cylinder body. Makes precise mounting quick and easy.

**Ports** - SAE "O" ring ports are standard.  
**Optional Ports** - NPTF ports are optional, with oversize NPTF and SAE also available.

**Primary Seal** - TS 200 Rod Seal is a proven leakproof design - completely self-compensating and self-relieving to withstand variations and conform to mechanical deflection that may occur.

**"Jewel" Rod Gland Assembly** - Externally removable without cylinder disassembly.

**Secondary Seal** - Double-Service Wiperseal™.

**Piston Rod Stud** - Furnished on 2.000" diameter rods and smaller when standard style #4 rod end threads are required. Studs have rolled threads and are made from high strength steel. Anaerobic adhesive is used to permanently lock the stud to the piston rod.

**Piston Rod** - Medium carbon steel, induction case-hardened, hard chrome-plated and polished to 10 RMS finish. Piston rods are made from 85,000 to 100,000 psi minimum yield material in .625" through 4.00" diameters. Larger diameters vary between 57,000 and 90,000 psi minimum material, depending on rod diameter.

**End Seals** - Pressure-actuated cylinder body-to-head and cap o-rings.

**Steel Head** - Bored and grooved to provide concentricity for mating parts.

### NORDON AGRICULTURAL CYLINDERS

Nordon NA Series cylinders are built for performance and durability, with a wide range of standard options to select from. These agricultural cylinders are designed to handle harsh environmental conditions, preserve a long life-cycle and all conform to ASAE Standards.
